2019 Households by Disposable In- come	2 Minute Drive Time	10 Minute Drive Time
<\$15,000	8.0%	11.0%
\$15,000—\$24,999	13.3%	11.6%
\$25,000—\$34,999	13.0%	10.4%
\$35,000—\$49,999	17.4%	15.1%
\$50,000—\$74,999	24.4%	21.3%
\$75,000—\$99,999	12.0%	12.4%
\$100,000—\$149,999	8.8%	12.5%
\$150,000+	3.2%	5.6%
Median Disposable Income	\$48,018	\$51,420

Note: Disposable income is after-tax household income.

Note: The Spending Potential Index is household-based, and represents the asset value or amount spent for a product or service relative to the national average of 100. Values higher than 100 indicate spending above the national average, and values lower than 100 indicate lower spending than the national average.

*This ratio indicates the number of employees working in the area versus the number of residents. A higher ratio indicates more commercial presence.

"Supply (retail sales) estimates sales to consumers by establishments. Sales to businesses are excluded. Demand (retail potential) estimates the expected amount spent by consumers at retail establishments. The Leakage/Surplus Factor measures the relationship between supply and demand that ranges from +100 (total leakage) to -100 (total surplus). A positive value represents "leakage" of retail opportunity outside the trade area. A negative value represents a surplus of retail sales, a market where customers are drawn in from outside the trade area. The Retail Gap represents the difference between Retail Potential and Retail Sales. The NAICS is used to classify businesses by their primary type of economic activity.

2 Minute Drive Tapestry Segmentation Area

Neighborhood Quick Facts*

Walk Score: 66Transit Score: 40Bike Score: 27

* The Walk Score is a measure between 0 and 100 that measures the ease of accessing amenities and running errands by walking. For more information, see http://www.walkscore.com/

TAPESTRY SEGMENT DESCRIPTIONS

Rustbelt Traditions

The backbone of older industrial cities in states surrounding the Great Lakes, Rustbelt Traditions residents are a mix of married-couple families and singles living in older developments of single-family homes. While varied, the work force is primarily white collar, with a higher concentration of skilled workers in manufacturing, retail trade, and health care. Rustbelt Traditions represents a large market of stable, hard-working consumers with modest incomes but an average net worth of nearly \$400,000. Family oriented, they value time spent at home. Most have lived, worked, and played in the same area for years.

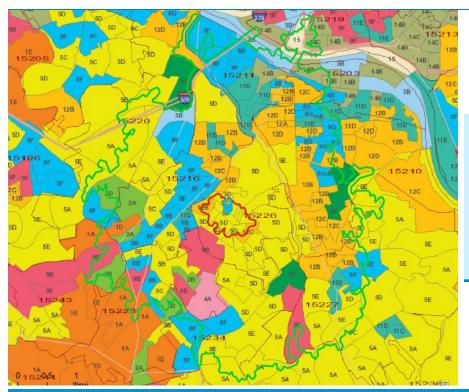

Small Town Simplicity

Small Town Simplicity includes young families and senior householders that are bound by community ties. The lifestyle is down-to-earth and semirural, with television for entertainment and news, and emphasis on convenience for both young parents and senior citizens. Residents embark on pursuits including online computer games, renting movies, indoor gardening, and rural activities like hunting and fishing. Residents keep their finances simple—paying bills in person and avoiding debt.

Traditional Living

Residents in this segment live primarily in low-density, settled neighborhoods in the Midwest. The households are a mix of married-couple families and singles. Many families encompass two generations who have lived and worked in the community; their children are likely to follow suit. The manufacturing, retail trade, and health care sectors are the primary sources of employment for these residents. This is a younger market—beginning householders who are juggling the responsibilities of living on their own or a new marriage, while retaining their youthful interests in style and fun.

Note: ESRI is an independent geographic information systems (GIS) corporation and is not affiliated with the Urban Redevelopment Authority of Pittsburgh. This analysis utilizes socioeconomic and marketing data to identify distinct segments of the population, map where they reside, and describe their socioeconomic qualities and consumer preferences. More information on tapestry segments and segment descriptions can be found at: https://doc.arcgis.com/en/esri-demographics/data/tapestry-segmentation.htm.

* The Walk Score is a measure between 0 and 100 that measures the ease of accessing amenities and running errands by walking. For more information, see http://www.walkscore.com/

TAPESTRY SEGMENT DESCRIPTIONS

Rustbelt Traditions

The backbone of older industrial cities in states surrounding the Great Lakes, Rustbelt Traditions residents are a mix of married-couple families and singles living in older developments of single-family homes. While varied, the work force is primarily white collar, with a higher concentration of skilled workers in manufacturing, retail trade, and health care. Rustbelt Traditions represents a large market of stable, hard-working consumers with modest incomes but an average net worth of nearly \$400,000. Family oriented, they value time spent at home. Most have lived, worked, and played in the same area for years.

Old and Newcomers

This market features singles' lifestyles, on a budget. The focus is more on convenience than consumerism, economy over acquisition. Old and Newcomers is composed of neighborhoods in transition, populated by renters who are just beginning their careers or retiring. Some are still in college; some are taking adult education classes. They support charity causes and are environmentally conscious. Age is not always obvious from their choices.

Traditional Living

Residents in this segment live primarily in low-density, settled neighborhoods in the Midwest. The households are a mix of married-couple families and singles. Many families encompass two generations who have lived and worked in the community; their children are likely to follow suit. The manufacturing, retail trade, and health care sectors are the primary sources of employment for these residents. This is a younger market—beginning householders who are juggling the responsibilities of living on their own or a new marriage, while retaining their youthful interests in style and fun.

Note: ESRI is an independent geographic information systems (GIS) corporation and is not affiliated with the Urban Redevelopment Authority of Pittsburgh. This analysis utilizes socioeconomic and marketing data to identify distinct segments of the population, map where they reside, and describe their socioeconomic qualities and consumer preferences. **More information on tapestry segments and segment descriptions can be found at:** https://doc.arcgis.com/en/esri-demographics/data/tapestry-segmentation.htm.
