\$150,000+	0.8%	4.5%
Median Disposable In- come	\$35,978	\$44,832

Note: Disposable income is after-tax household income

Note: The Spending Potential Index is household-based, and represents the asset value or amount spent for a product or service relative to the national average of 100. Values higher than 100 indicate spending above the national average, and values lower than 100 indicate lower spending than the national average.

*This ratio indicates the number of employees working in the area versus the number of residents. A higher ratio indicates more commercial presence.

**Supply (retail sales) estimates sales to consumers by establishments. Sales to businesses are excluded. Demand (retail potential) estimates the expected amount spent by consumers at retail establishments. The Leakage/Surplus Factor measures the relationship between supply and demand that ranges from +100 (total leakage) to -100 (total surplus). A positive value represents 'leakage' of retail opportunity outside the trade area. A negative value represents a surplus of retail sales, a market where customers are drawn in from outside the trade area. The Retail Gap represents the difference between Retail Potential and Retail Sales. The NAICS is used to classify businesses by their primary type of economic activity.

Building Pittsburgh with Ura

Modest Income Homes

Families in this urban segment may be nontraditional; however, their religious faith and family values guide their modest lifestyles. Many residents are primary caregivers to their elderly family members. Jobs are not always easy to come by, but wages and salary income are still the main sources of income for most households. Reliance on Social Security and public assistance income is necessary to support single-parent and multigenerational families. High poverty rates in this market make it difficult to make ends meet. Rents are relatively low (Index 70), public transportation is available, and Medicaid can assist families in need.

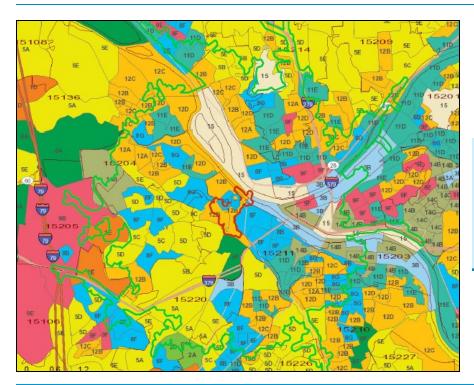

Traditional Living

Residents in this segment live primarily in low-density, settled neighborhoods in the Midwest. The households are a mix of married-couple families and singles. Many families encompass two generations who have lived and worked in the community; their children are likely to follow suit. The manufacturing, retail trade, and health care sectors are the primary sources of employment for these residents. This is a younger market beginning householders who are juggling the responsibilities of living on their own or a new marriage, while retaining their youthful interests in style and fun.

Hometown Heritage

Hometown Heritage neighborhoods are in urbanized areas within central cities, with older housing, located mainly in the Midwest and South. This slightly smaller market is primarily a family market, married couples (with and without children) and single parents. They work mainly in service, manufacturing, and retail trade industries. 60% of households are renters, living primarily in single-family homes, with a higher proportion of dwellings in 2-4 unit buildings.

> Note: ESRI is an independent geographic information systems (GIS) corporation and is not affiliated with the Urban Redevelopment Authority of Pittsburgh. This analysis utilizes socioeconomic and marketing data to identify distinct segments of the population, map where they reside, and describe their socioeconomic qualities and consumer preferences. **More information on tapestry segments and segment descriptions can be found at:** <u>https://doc.arcgis.com/en/esri-demographics/data/tapestry-segmentation.htm</u>.

10 Minute Drive Tapestry Segmentation Area Profile

Neighborhood Quick Facts* Number of bus lines in neighborhood: 9

* The Walk Score is a measure between 0 and 100 that measures the ease of accessing amenities and running errands by walking. For more information, see http://www.walkscore.com/

TAPESTRY SEGMENT DESCRIPTIONS

Rustbelt Traditions

The backbone of older industrial cities in states surrounding the Great Lakes, Rustbelt Traditions residents are a mix of married-couple families and singles living in older developments of single-family homes. While varied, the work force is primarily white collar, with a higher concentration of skilled workers in manufacturing, retail trade, and health care. Rustbelt Traditions represents a large market of stable, hard-working consumers with modest incomes but an average net worth of nearly \$400,000. Family oriented, they value time spent at home. Most have lived, worked, and played in the same area for years.

Old and Newcomers

This market features singles' lifestyles, on a budget. The focus is more on convenience than consumerism, economy over acquisition. Old and Newcomers is composed of neighborhoods in transition, populated by renters who are just beginning their careers or retiring. Some are still in college; some are taking adult education classes. They support charity causes and are environmentally conscious. Age is not always obvious from their choices.

Set to Impress

Set to Impress is depicted by medium to large multiunit apartments with lower than average rents. These apartments are often nestled into neighborhoods with other businesses or single-family housing. Nearly one in three residents are 20 to 34 years old, and a large portion are single person nonfamily households. Although many residents live alone, they preserve close connections with their families. Many work in food service while they are attending college. This group is always looking for a deal. They are very conscious of their image and seek to bolster their status with the latest fashion. Set to Impress residents are tapped into popular music and the local music scene.

Note: ESRI is an independent geographic information systems (GIS) corporation and is not affiliated with the Urban Redevelopment Authority of Pittsburgh. This analysis utilizes socioeconomic and marketing data to identify distinct segments of the population, map where they reside, and describe their socioeconomic qualities and consumer preferences. **More information on tapestry segments and segment descriptions can be found at:** <u>https://doc.arcgis.com/en/esri-demographics/data/tapestry-segmentation.htm</u>.

URA Small Business Resources

No matter what your business needs, we are here to help.

The URA is committed to supporting Pittsburgh's next generation of creators, thinkers, innovators, and inventors by fostering new entrepreneurship and business expansion. We do this through a variety of business financing programs for small– and medium-sized business development and commercial real estate development. These are gap financing products work in conjunction with private equity and private debt to help your business close the financing for your business growth and expansion.

Our team also works with a large network of technical assistance providers and partners to help your business start, improve, and grow. Whether your business is considering a move to Pittsburgh, building a new facility to accommodate expansion, seeking working capital to underwrite growth, purchasing or leasing new equipment, or all of the above, we're here to help.

For more information on any these programs, please contact Lynnette Morris at <u>Imorris@ura.org</u> or visit us at www.ura.org/pages/businesses-entrepreneurs.
